STANLEY®

Patented Self Adjusting Turbine Vanes:

- allow passage of large debris
- maximise power from water flow
- allow operation at low flow, with energy saving throat insert in place

Patented Steering System

A unique, patented steering system that allows it to clean pools of all shapes and sizes. The left wheel is set to reverse at intervals, turning the unit in different directions so it doesn't get stuck in corners.

The cleaner travels 2.5 to 3.0 metres before turning (turns range from 90 to 450 degrees).

This allows the cleaner to cover both the shallow and deep ends of the pool.

Robust Tyre Treads

The patented tyre treads ensure excellent climbing ability and the manoeuvrability to handle any obstacle, making it ideal for all pool shapes and surfaces. Special tyres are available for tiled pools.

Adjustable Skirt

The patented adjustable skirts have rollers that allow it to maintain optimal suction, even when faced with the most difficult obstacles.

Easy to Install

Can be up and running in just a few minutes by following the easy instructions. Everything you need is in the box – no tools or additional components are required.

Energy Saving Throat Insert

When using a variable speed pool pump, use the cleaners small throat insert to allow it to operate at the pumps low speed/flow, resulting in reduced running costs. Instructions are in the user manual.

Warranty

The cleaner comes with a 3 + 3 warranty. (3 years full and 3 years pro rata) Details are in the user manual.
